## How to install Sunda EasyFix

NO FIXINGS REQUIRED

### Step 1. Handle with Care:
- Handle panels with clean hands or clean gloves to avoid marks.

### Step 2. Prepare Wall Surface:
- Ensure the wall surface is clean and dry.
- Panels can be fixed to solid surfaces like concrete, plasterboard, and block work.
- Remove any wallpaper.
- Brush emulsion paint with a stiff brush.
- Ensure there is no cold bridging or dampness on the surface. Eliminate any condensation or dampness before applying panels.
- Ensure the surface is 100% flat for secure adhesion.
### Step 3. Apply Panels:
- Peel off the backing paper from the panel.
- Immediately apply the panel to the prepared surface to ensure good adhesion.

## Sunda EasyFix
# Materials

Sunda EasyFix panels feature a high-quality melamine foam core paired with a premium fabric face, offering a luxurious finish and a wide variety of colour options.

| Sonus - Chorus | Sonus - Classical | Sonus - Lyric | Sonus - Melody | Sonus - Music |
| Sonus - Pop | Sonus - Rap | Sonus - Song | Sonus - Soul | Sonus - Verse |
| Sonus - Vocal | Sonus - Voice | Cara - Black | Cara - Chaucer | Cara - Galilee |
| Cara - Glass | Cara - Lomond | Cara - Maree | Cara - Pitlochry | Cara - Vit |
## Samples

If you would like a closer look at our EasyFix fabric collections, please get in touch with a member of our team.

## Storage & Handling

To ensure the integrity of Sunda EasyFix panels, protect them from excessive moisture during storage and handling. It is advisable to acclimate the panels for at least two days prior to installation to prevent any dimensional changes.

## Aftercare & Maintenance

After installing the panels, remove any dust from their surfaces. Clear away any excess materials, rubbish, and debris generated during the installation process, ensuring the installation areas are left neat and clean.

# FAQs

**What surfaces can I install Sunda EasyFix on to?**
The right surface should ensure a secure, long-lasting installation. Suitable surfaces include:
Drywall/plasterboard - Smooth, even surfaces ideal for panel adhesion.
Painted Walls - Flat, non-textured paint finishes work well. Avoid glossy paints.
Concrete - Bare, unpainted concrete is suitable if clean, dry, and free of coatings.
Plywood - Sturdy, flat plywood provides a good base for panel application. Proper surface preparation, with the surface being clean, dry, and free of contaminants, is crucial for ensuring a secure, long-lasting bond.

**How many Sunda EasyFix panels do I need?**
Determining the optimal quantity of EasyFix panels isn't an exact science. Broadly, increased surface coverage leads to greater sound absorption and reduced echo. As a general guideline, aiming to cover approximately 30% to 50% of the wall area typically results in effective sound absorption.

**Can I remove and reposition the panel once I've stuck it to my wall?**
The EasyFix panel is designed to be a permanent installation and therefore once in place and the adhesive has set it is not possible to reposition.

**How long will this Sunda EasyFix panel stick on my wall for?**
Following installation on a compatible surface, the EasyFix panel maintains secure positioning for an extended duration, ensuring long-lasting acoustic performance.

**Can I install Sunda EasyFix to the ceiling?**
We would not encourage installing EasyFix onto the ceiling due to the weight of this product however, if you are installing this to the ceiling, an additional silicone adhesive must be used which covers 100% of the panel surface.
