Sunda Wall Circle

Installation

How to install Sunda Wall

Step 1. Mark the Area:

• Lightly trace the edges of the panel onto the desired installation area.

Step 2.Attach Clips:

• Measure, mark and then securely fix the appropriate number of clips using screws within the traced area.

Step 3. Apply Adhesive:

 Spray high-strength contact adhesive vertically onto the panel's reverse surface and horizontally onto the desired installation area. Be sure to spray over the clips. Ensure the adhesive covers 100% of both surfaces.

Step 4. Wait for Adhesive to Dry:

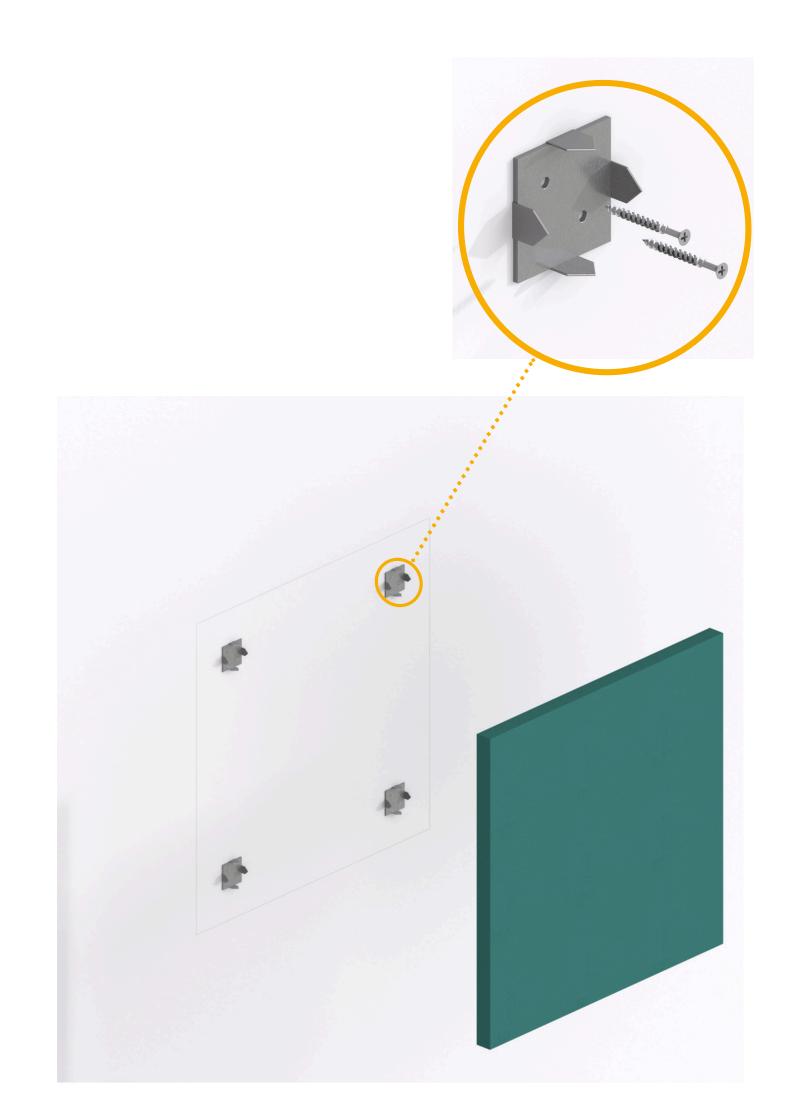

• Allow the adhesive to dry for 2-5 minutes at 23°C.

Step 5. Align and Attach Panel:

• Carefully align the panel with the marked area and push gently, allowing the clip spikes to bite into the panel.

6. Press Firmly:

• Once the panel is properly positioned, press firmly over the entire surface to ensure maximum contact with the wall.

Sunda Wall Materials

Sunda Wall features a dense glass wool core, providing exceptional sound absorption while being environmentally sustainable. Its highquality fabric face delivers a premium finish and comes in a wide range of colours.

Storage & Handling

Protect Sunda Wall from excessive moisture during storage and handling. Avoid placing or stacking items on top of the panels to prevent damage. Handle with clean hands or gloves to avoid marks. Store in a clean, uncluttered area to prevent accidental damage.

Aftercare & Maintenance

Sunda Wall requires minimal maintenance postinstallation. For cleaning, use a damp cloth as needed and dust periodically to keep the panels looking their best.

FAQs

How many panels do I need? Determining the optimal quantity of wall panels isn't an exact science. Broadly, increased surface coverage leads to greater sound absorption and reduced echo. As a general guideline, aiming to cover approximately 30% to 50% of the wall area typically results in effective sound absorption.

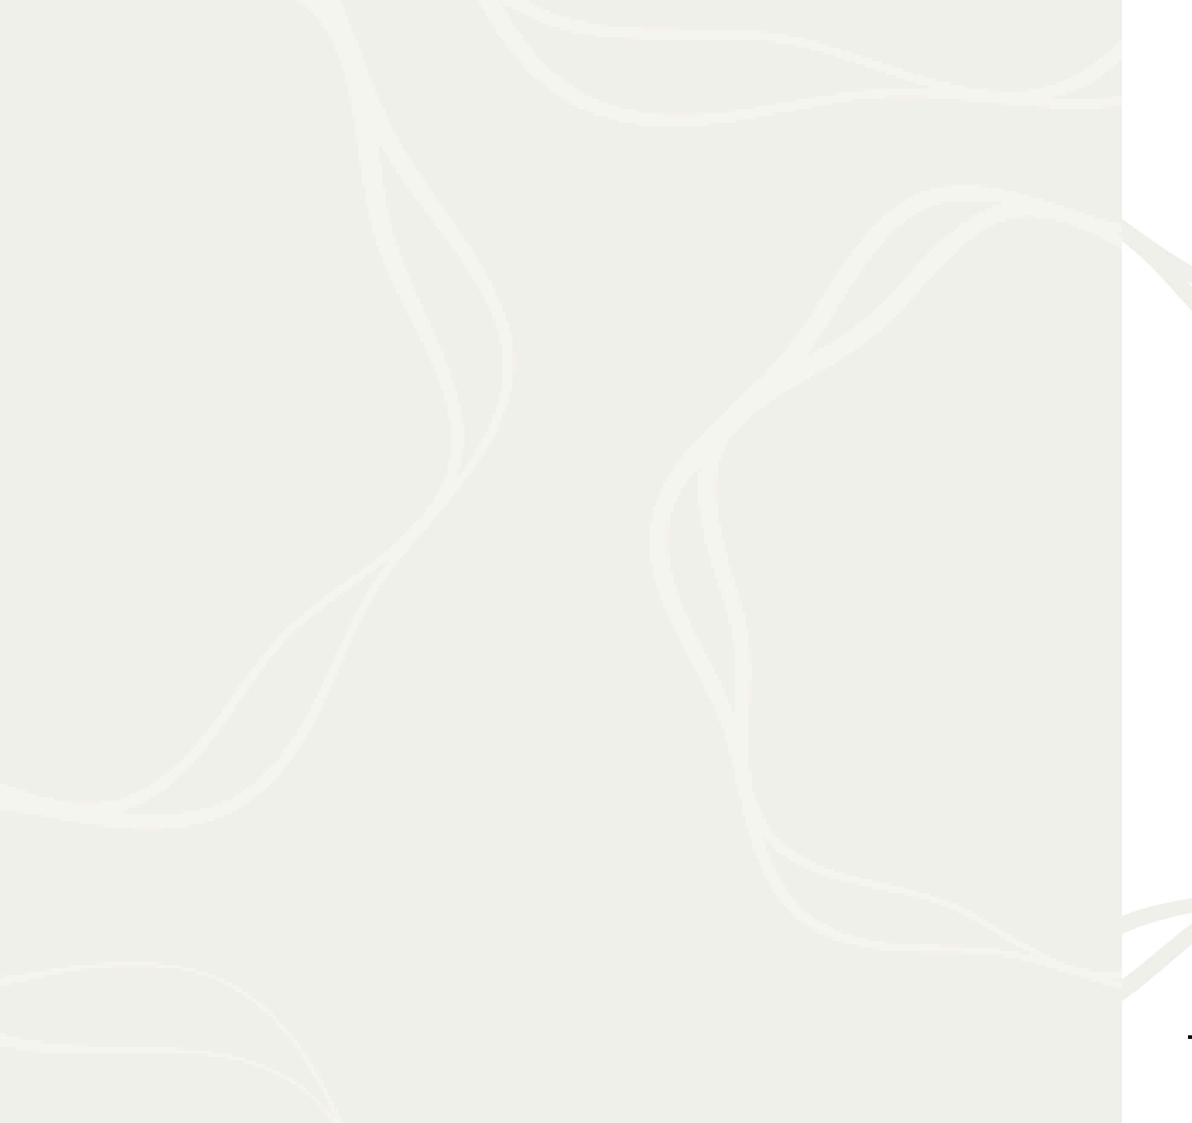

Do you make this wall panel in custom shapes and sizes? Yes, although we have a standard range of the most popular sizes it is possible to have a customised size of the Sunda Wall Panel to suit your requirements.

Do I need any screws or equipment to install these panels? The only fixings you will need in addition to the supplied impaling clips are the screws to attach these to the wall. We do not supply these screws as the appropriate screws will be dependent on your soffit structure ie. Plasterboard, concrete, timber which your local DIY store will be able to recommend.

Is there a warranty with Sunda Raft? Our Sunda Wall Panel comes with a one-year manufacturer's warranty, providing coverage for any defects in materials or workmanship.

Where is this product shipped from? Sunda Wall is manufactured in and shipped from the UK.

How do these wall panels arrive? Your delivery will arrive fully packaged and protected on a specific vehicle for the size and weight of your delivery.
